

Diego Quiñones

Analista Programador & Automation Specialist

yeyobitz@proton.me | LinkedIn | GitHub

Resumen

Analista Programador con experiencia en desarrollo web full-stack usando Python (Django/Flask) en el backend y React/Astro en el frontend. Especializado en automatización de procesos con Bash y Python, administración de servidores Linux y orquestación de agentes de IA/LLM para soluciones autónomas. Enfocado en crear sistemas eficientes mediante scripting, contenedores Docker e infraestructura cloud.

Habilidades Tecnicas

Backend

- **Python** [Avanzado] — Scripting, Automation

Frontend

- **JavaScript** [Intermedio] — Web Development
- **TypeScript** [Intermedio] — Type Safety
- **HTML** [Avanzado] — Semantic
- **CSS** [Avanzado] — Responsive

Databases

- **SQL** [Avanzado] — Queries

Linux

- **Bash** [Intermedio] — Scripting, Automation

GameDev

- **C#** [Basico] — Unity

Python

- **Django** [Intermedio] — Web Framework
- **Flask** [Intermedio] — API, Microservices

JavaScript

- **Node.js** [Basico] — Backend

UI

- **React** [Intermedio] — SPA

Static Sites

- **Astro** [Intermedio] — Performance

Utility-First

- **Tailwind CSS** [Intermedio] — Responsive

React

- **Next.js** [Basico] — SSR

SQL

- **MySQL** [Avanzado] — Relational
- **PostgreSQL** [Intermedio] — Relational
- **Oracle** [Intermedio] — Enterprise

NoSQL

- **MongoDB** [Intermedio] — Document

Cloud

- **Firebase** [Intermedio] — Real-time

Containers

- **Docker** [Intermedio] — Deployment

Ubuntu

- **Linux Server** [Avanzado] — Systemd, Security

Version Control

- **Git/GitHub** [Intermedio] — CI/CD

Security

- **UFW/Firewall** [Intermedio] — Networking

Web Server

- **Nginx** [Intermedio] — Reverse Proxy

DNS

- **Cloudflare** [Intermedio] — Tunnels, Security

VPN

- **Tailscale** [Intermedio] — Networking

AI

- **LLM Prompting** [Avanzado] — GPT, Claude

Orchestration

- **AI Agents** [Avanzado] — Autonomous

Bash

- **Automation** [Avanzado] — Python, Cron

Integration

- **Make.com** [Basico] — Workflow

Editor

- **VS Code** [Avanzado] — Development

UI/UX

- **Figma** [Intermedio] — Design

Graphics

- **Photoshop** [Intermedio] — Editing

API

- **Postman** [Intermedio] — Testing
-

Proyectos

Super Tik-Tak-Toe

Full Stack Developer | 2 months | JavaScript, HTML, CSS, Firebase

Implementación del algoritmo minimax en un tres en raya multijugador con dificultad ajustable y tablero global de puntuaciones.

- Game mode: 1 vs CPU or 1 vs 1
- Adjustable difficulty: Easy, Medium, Hard
- Implementation of minimax algorithm
- Global leaderboard

Demo

Aprendizajes: Deep understanding of game theory and AI algorithms, Importance of UX in game design, Real-time database management

Tregua Project

Lead Developer | 3 months | React, Firebase, Tailwind, Vite

Sistema de gestión para restaurante con panel de administración, reservas y menú dinámico, construido con React y Firebase.

- Reservation and menu management system
- Administration panel
- Real-time updates
- Responsive design

Demo | Código

Aprendizajes: Real-time database management in a production environment, Importance of user training in system adoption, Complex state management in React applications

Generic Platformer #18001

Game Developer | 1 month | Unreal Engine, Blueprints

Juego de plataformas desarrollado en Unreal Engine 4 usando Blueprints, con múltiples niveles y música original.

- Developed in UE4 using blueprints
- Implementation of player movement
- Original BGM
- Multiple levels

Aprendizajes: Visual programming concepts, Game physics and collision detection, Level design principles

Pochita Vet-App

Backend Developer | 2 months | Python, Django, MySQL, Bootstrap

Aplicación web para gestión de clínica veterinaria desarrollada con Django y MySQL como proyecto académico colaborativo.

- Veterinary clinic management system
- Collaborative project with other INACAP students
- Patient records management
- Appointment scheduling

Código

Aprendizajes: Team collaboration and git workflow, Database design and relationships, Django MVT architecture
